As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 07.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website sells plastic bottles, offering a variety of sizes and designs to meet both personal and industrial needs. The bottles are made from safe, durable materials, ensuring reliability and user-friendliness.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Design Plan: PolySite	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0.	
Effective Date: 15-01-2025	Version 1.0	Page No: 2 of 34	

Problem Definition

PolySite is a company specializing in the production, supply, and export of various types of PET, PP, and PC bottles used in diverse industries such as packaged drinking water, household chemicals, pharmaceuticals, cooking oil, alcohol, hair care, and pesticides. To enhance their online presence and streamline interactions with customers, PolySite requires a comprehensive website that effectively showcases their products and services.

We need to design a SPA and responsive website with the following criteria:

1. User-friendly, where customers can easily navigate through product categories, view detailed specifications and pricing, browse a collection of images, provide feedback, and access contact information. Additionally, the website will allow users to download detailed product descriptions in PDF or DOC.
2. The website consists of a set of pages and menus that represent the choice of activities to be performed. Pages, menus, and other visual elements must be designed in a visually appealing way with attractive fonts, colors, and animations. All of these should also be presented in a responsive manner.
3. The menu is well-designed with necessary submenu options.
4. Consistent color scheme throughout the website.
5. Smooth navigation across all pages

The structure, interface, and functionality of the website

1. Home page:
 - Display the company logo.

Design Plan: PolySite	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0.	
Effective Date: 15-01-2025	Version 1.0	Page No: 3 of 34	

- Include a navigation bar with: Home, About Us, Products, Services, Gallery, Contact Us, Feedback.

- Include a brief introduction with a "see more" button that navigates to the About Us page.

- Contains a type of bottle along with a representative image; clicking on the image will navigate to the corresponding bottle page in Products.

- Contains information about various services offered by PolySite to attract potential customers and partners (including images, service names, and a navigation button to the detailed page).

- Contains a footer divided into 4 sections with the following information: Headquarters, Branches, Google map (occupying 2 sections)

2. About Us

- Information about PolySite, its history, mission, and values.

3. Products

- Detailed pages for different bottle categories with images, specifications, and pricing information.

- Includes a download button: an option for users to download the full product description as a PDF or DOC file for offline access.

4. Services

- Information about the various services offered by PolySite to attract potential customers and partners.

5. Gallery

- A visual display room showcasing various bottles and packaging solutions offered by PolySite.

Customer Requirements Specifications

User:

input:

- Provide feedback on the experience of using the website, including any issues encountered and suggestions for improvement.
- Use search engines to find information and products, thereby generating user behavior data.

Process:

- Send customer feedback to the repository
- Search for products according to the information provided by customers in the system

Output:

- Popup responds successfully
- Show products that look like potential customer information

	Prepared by (Student)	Approved by (Faculty)

Date		

Design Plan: PolySite	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS/Ver1.0.	
Effective Date: 15-01-2025	Version 1.0	Page No: 6 of 34	

Webmaster:

Input:

- Collect access data from Google Analytics and Search Console
- Gather server logs and system data
- Collect information from SEO tools and CRM
- Gather feedback from users

Process:

- Process data from Google Analytics and Search Console
- Process server logs to detect errors and security issues
- Process SEO data to optimize content and improve search rankings
- Process user feedback to enhance website experience and interface

Output:

- Generate performance reports on user access and behavior to enhance website operational efficiency.
- Export a list of keywords and content that need optimization.
- Export security error alerts and a remediation plan.
- Export charts and reports for visualizing SEO data.

VII. Service Detail

Design Your Personalized Bottles

First things first. When you're looking for a custom bottle, the first step naturally is going to be the design stage. For custom-made bottles, it is important to consider the shape, size, dispensing mechanism, and printing technique. At Polysite, we offer numerous dispensing mechanisms and customization techniques, each of which will be covered in more detail below. We advise using our in-stock bottles for customization, however, if you're looking at a custom size/shape, this is possible as well. For custom bottles, the MOQ ranges from 1,500 to 20,000 units - depending on the complexity of the design. If you choose to order your personalized bottles from us, you will naturally receive a sample of your custom bottle by mail to inspect before starting the production of your wholesale order.

XI. Order

The screenshot shows a web form for placing an order. The header is red with navigation links: Home Page, About Us, Products, Services, Gallery, and Contact Us. A search bar is on the right. The main form area is titled 'Order Information' and contains three input fields: 'Name:' (placeholder: Enter your name), 'Phone Number:' (placeholder: Enter a phone number), and 'Address:' (placeholder: Enter your address). Below these is a section for 'Selected Products' with a table header (Product, Price, Quantity, Amount, Action) and a message 'Your shopping cart is empty!'. At the bottom right, it shows 'Total payment: 0 USD' and two green buttons labeled 'Order' and 'Cancel'.

Submit checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12	Is the navigation sequences correct through all the Web pages on the site?	
13	Is the JavaScript code working as expected in all click events?
